

THE PROBLEM

- Lost Easily
- Damaged

- Can be duplicated
- Difficult to verify

- Centralized
- Limited transparency

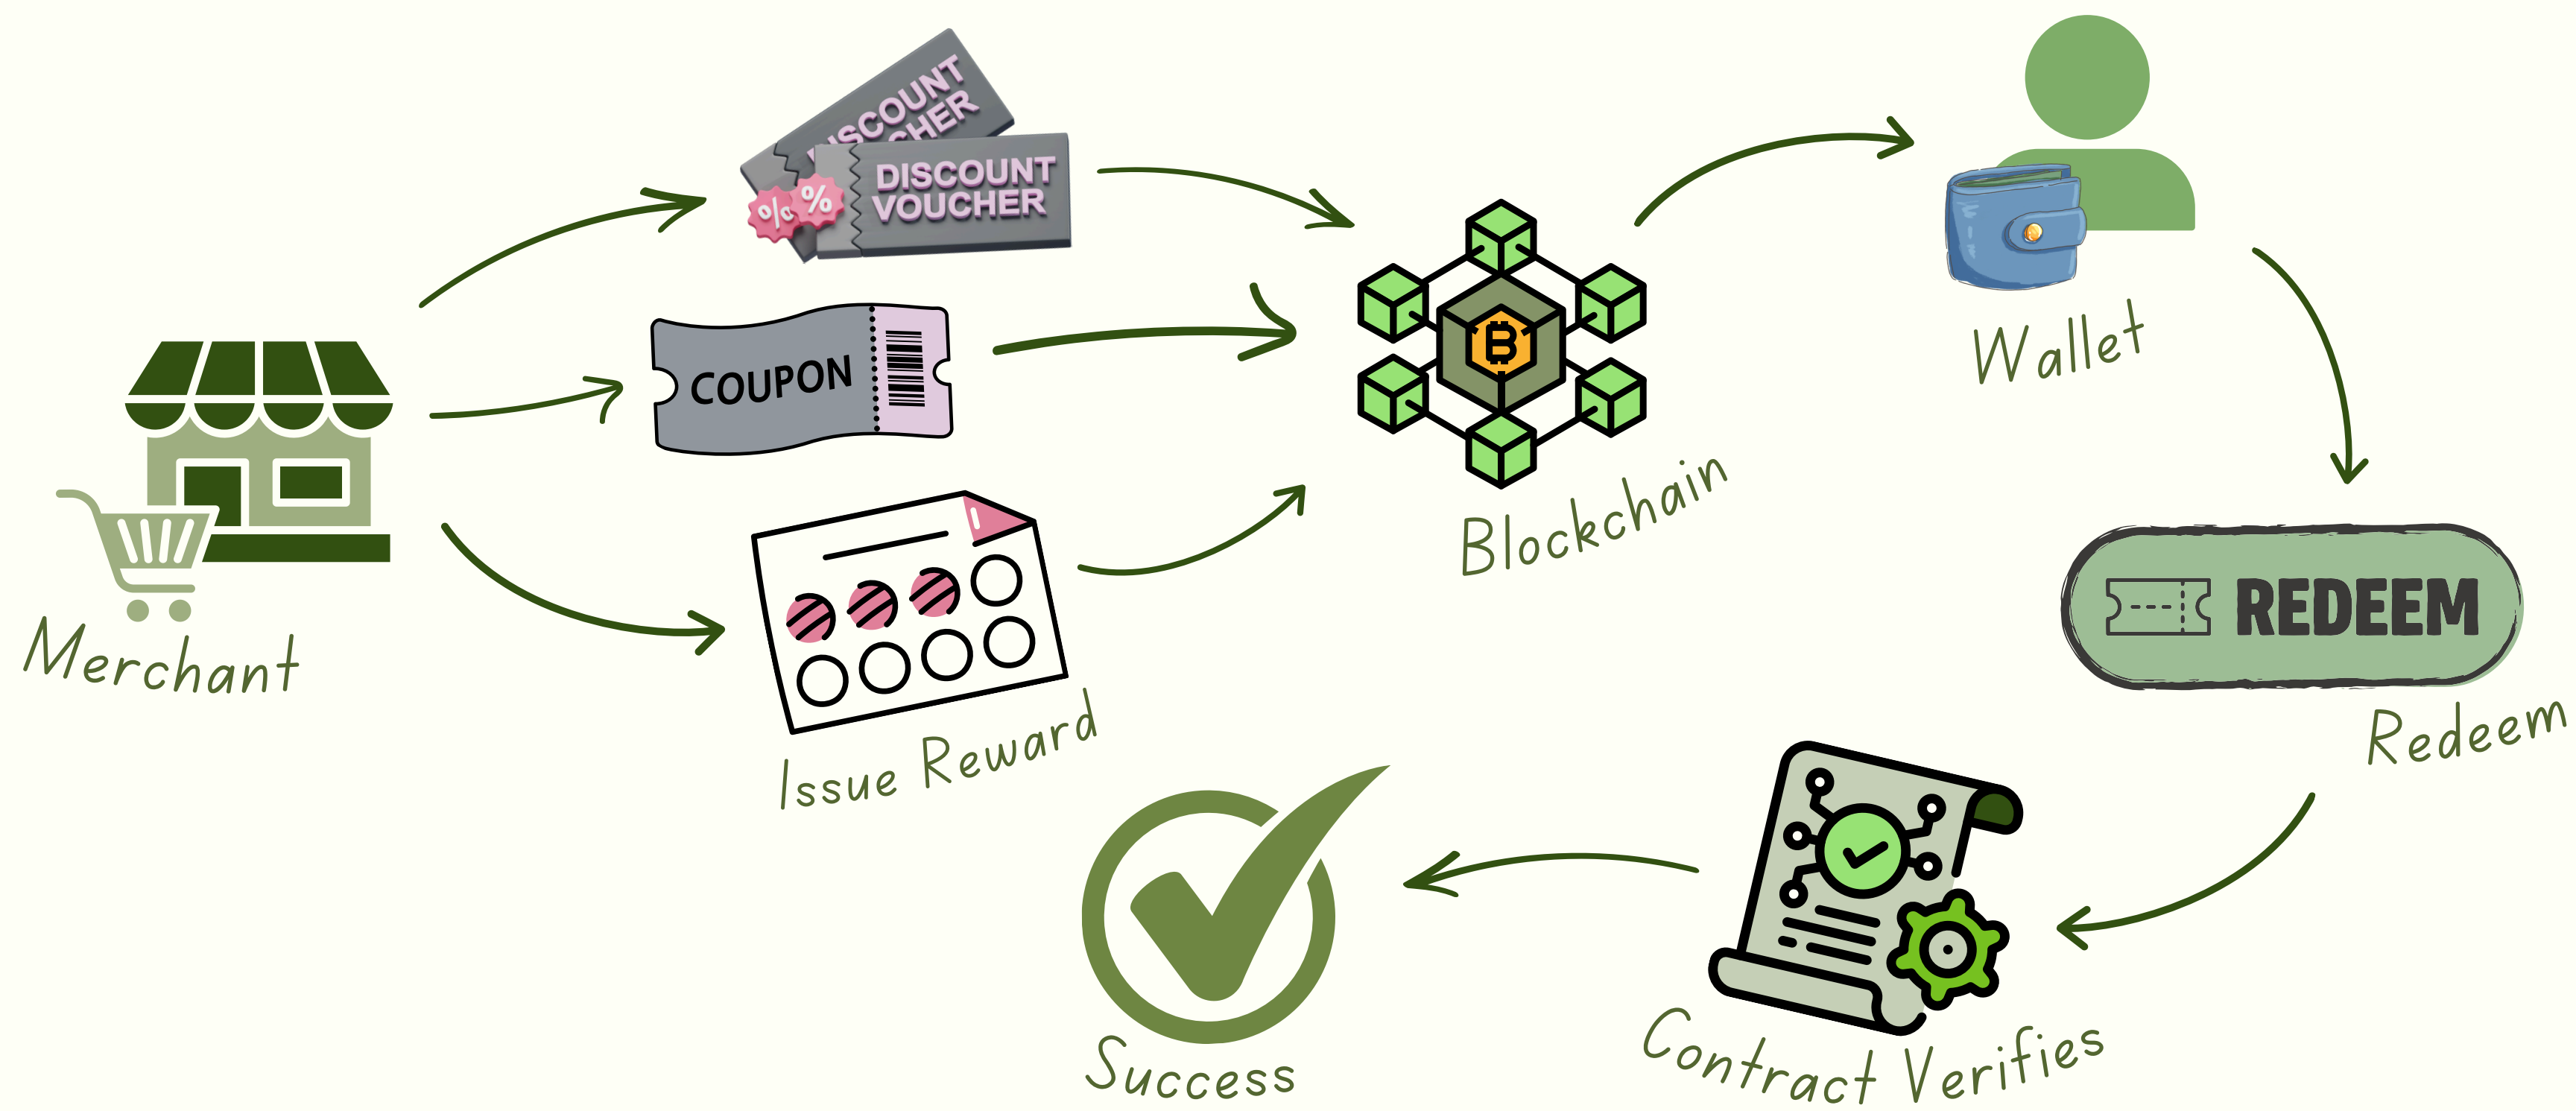

CLIPCASH

ClipCash is a decentralized loyalty and rewards platform that transforms traditional vouchers, coupons, and punch cards into secure digital assets on the Bitcoin Cash blockchain. Using CashTokens and CashScript, businesses can issue programmable rewards that are verifiable, resistant to fraud, and capable of automatically enforcing redemption rules.

How SmartClipCash Works

From Purchase to Reward Redemption

SmartClipCash replaces traditional paper loyalty cards with secure blockchain-powered digital reward stamps using Bitcoin Cash CashTokens.

Customer Journey

STEP 1

Make a Purchase

The customer buys from a participating merchant.

STEP 2

Receive Digital Stamp

The merchant issues a CashToken reward directly to the customer's wallet.

STEP 3

Collect Rewards

Every purchase adds more digital stamps until the required amount is reached.

STEP 4

Redeem Reward

Redeem completed stamp

CLIPCASH

Built on **Bitcoin Cash**, and it uses **CashTokens** to represent digital vouchers, coupons, and punch cards as secure blockchain assets. **CashScript** then automatically validates redemption rules, enabling fast, low-cost, and trustworthy reward transactions.

React Framework, Vue, and Tailwind CSS
for the frontend.
